

V Smart Health Care Device

RF Excited Co2 Laser

Fractional/Conventional/Vaginal

Fractional scanner is the latest revolutionary product to offer Micro spot fractional skin resurfacing technology. Combining the Co2 laser (10600nm wavelength) for skin renewal procedures with the high-speed scanner to deliver. By applying the Co2 laser energy in a fractionated manner, very small column of thermic damage are created as per the dermis.

Technical Specifications :

Laser Type	RF Laser Tube(Coherent)
Wavelength	10600nm
Output Power	50Watts
Display	10.4" color touch LCD screen
Scan pattern	Square, Rectangle, Round, Triangle, Diamond shape. Line or Customized Graphics.
Scan pattern size	0.1 x 0.1mm To 20 x 20 mm
Spot size	0.01 To 0.07 mm
Scan Mode	Free, Sequence, Maximum Distance Scan
Pulse Duration	0.1 to 2.6 ms
Spot Distance	0.1 to 2.6 mm
Pulse energy	1 to 100 mJ
Interval Between Scanning	0 to 6 Sec
Laser apparatus	Sealed off Laser Device stimulated by DC
Aiming Beam	635nm Infrared ray
Beam transport Device	7 Articulated Arm
Cooling System	Air
Dimension of Machine	43 x 57 x 118cm
Dimension of package	66 x 70 x 122cm
Net Weight	47 Kgs
Gross weight	72 Kgs

Application:

- Collagen contractions and Remolding
- Skin Tightening and Lifting
- Pore minimizing
- Pigmentation and Age spots removing
- Improve skin texture and skin tone
- Treat Acne scars
- Tighten Vagina
- Clean and Maintain vagina
- Nourish vagina, eliminate situation
- Warts and skin tag removal

Range of Cosmetology Products

- Diode Laser
- Q Switch Nd-Yag Laser
- Intense Pulse Light (IPL)
- Microdermabrasion
- Cosmo Chair
